1. Executive Summary

This report presents a detailed analysis of coffee shop sales performance using an interactive dashboard. The objective is to identify trends, peak sales periods, product performance, and location-based insights to support data-driven business decisions.

---

2. Objectives of Analysis

The analysis was conducted to answer the following business questions:

- How do sales vary by day of the week and hour of the day?
- Are there any peak sales times?
- What is the total monthly revenue?
- How do sales vary across store locations?
- What is the average bill value per customer?
- Which products are best-selling by quantity and revenue?
- How do sales vary by product category and type?

---

3. Data Overview

Dataset Contains:

- Transaction Date & Time
- Store Location
- Product Name & Category
- Quantity Sold
- Sales Amount
- Order Size
- Customer Footfall

---

4. Key Performance Indicators (KPIs)

Metric	Value
Total Sales	698,493
Total Footfall	149,117
Avg Bill per Person	4.68
Avg Orders per Person	1.44

---

5. Sales Trend Analysis

5.1 Monthly Revenue Trend

Sales show steady growth from January to June, indicating increasing customer demand and improved performance.

5.2 Day & Hour Analysis

- Peak hours observed between **8 AM – 10 AM**
- Weekend sales slightly higher than weekdays
- Early morning and late evening hours show lower activity

---

6. Location Performance

Comparison of store locations:

Location	Observation
Hell's Kitchen	Highest revenue
Astoria	Moderate performance
Lower Manhattan	Slightly lower than others

---

7. Product Performance

Top Selling Products

- Ethiopian
- Jamaican Coffee River
- Brazilian
- Latte

These products contribute the highest revenue and transaction volume.

---

8. Category Contribution

Highest revenue generated from:

1. Coffee
2. Tea
3. Bakery

Coffee category dominates total sales share.

---

9. Order Size Distribution

- Large and Regular orders contribute most revenue.
- Small orders represent a smaller share.
- Some orders categorized as “Not Defined” indicating data cleanup opportunity

---

10. Insights & Recommendations

Insights

- Morning hours are the strongest sales window.
- Coffee products drive the majority of revenue.
- Certain locations outperform others consistently.

Recommendations

- Increase staff during peak morning hours.
- Promote low-performing products.
- Replicate strategies from top-performing store locations.
- Clean dataset to remove undefined order sizes.

---

11. Conclusion

The dashboard analysis highlights key trends in customer behavior, product demand, and store performance. Leveraging these insights can help optimize operations, improve marketing strategies, and increase revenue.

---

12. Tools Used

- Microsoft Excel Dashboard
- Pivot Tables
- Charts & Visualizations
- Data Cleaning Techniques
